Neets Module 10-Introduction to Wave Propagation

Wave propagation is any of the ways in which waves travel.. With respect to the direction of the oscillation relative to the propagation direction, we can distinguish between longitudinal wave and transverse waves.. For electromagnetic waves, propagation may occur in a vacuum as well as in a material medium. Other wave types cannot propagate through a vacuum and need a transmission medium to ...

The ARRL Antenna Book is a practical introduction to antenna design. For a book this thick, it's strange to call it an introduction, but it is as it covers everything from safety, through antenna performance, to antenna design and modeling.

Radio waves in vacuum travel at the speed of light. When passing through a material medium, they are slowed according to that object's permeability and permittivity. Air is thin enough that in the Earth's atmosphere radio waves travel very close to the speed of light.
