The Sciencemadness library currently holds 50426 pages of reading and reference material in 107 volumes. Shorter articles from the old Sciencemadness library remain available. Thanks go to BromicAcid for providing hosting for these old books during our time of lean bandwidth. Thanks also go to S.C. Wack for providing many of the books found here. Most of these books are provided as PDF with ...

Organofluorine chemistry describes the chemistry of the organofluorines, organic compounds that contain the carbon-fluorine bond. Organofluorine compounds find diverse applications ranging from oil and water repellents to pharmaceuticals, refrigerants, and reagents in catalysis. In addition to these applications, some organofluorine compounds are pollutants because of their contributions to ...

The principles and their application for the synthesis of some of the naturally occurring compounds will be described in this note. Major topics covered includes: Formation of Aliphatic Carbon-Carbon Bonds: Base Catalyzed Reactions and Acid Catalyzed Reactions, Organometallic Reagents, Nucleophilic Aromatic Substitution, Aromatic Diazonium Salts, Molecular Rearrangements, eagents Containing ...

MOPS are an emerging new class of microporous hybrid materials that are conceptually similar but complementary to MOFs. Both class of compounds provide for "functional porosity" and "component modularity". MOPS, moreover, allow a continuous porosity tuning in the sub-...ngstrm range allowing for a highly rational tailoring of micropores.

Guidelines for all Chemistry Majors, Concentrators, and Interdepartmental Majors. Students majoring in chemistry or in one of the interdepartmental majors in chemistry should go to the director of undergraduate studies or the undergraduate program manager in the Department of Chemistry to discuss their program of study.

In organic chemistry, an alkene is an unsaturated hydrocarbon that contains at least one carbon-carbon double bond. The words alkene and olefin are often used interchangeably (see nomenclature section below). Acyclic alkenes, with only one double bond and no other functional groups, known as mono-enes, form a homologous series of hydrocarbons with the general formula  $C_n H_{2n}$ .

1. Introduction. Quinones are a large class of compounds endowed with rich and fascinating chemistry. 1,4-Benzoquinone or p-benzoquinone (1) is the basic structure of quinonoid compounds. They are widely distributed in the natural world, 2 being found in bacteria, plants and arthropods and hence quinones are ubiquitous to living systems. Quinones play pivotal role in biological functions ...

Preparation of Bioconjugated Quantum Dots. High quality core/shell QDs are most often made by using hot colloidal synthesis, which leaves their surface coated with hydrophobic moieties (e.g. trioctylphosphine oxide (TOPO), oleic acid, and/or trioctylphosphine (TOP)), that prohibit their dispersion in biological fluids.
