

concepts of occupational therapy pdf

Occupational therapy (OT) is the use of assessment and intervention to develop, recover, or maintain the meaningful activities, or occupations, of individuals, groups, or communities. It is an allied health profession performed by occupational therapists and Occupational Therapy Assistants. OTs often work with people with mental health problems, disabilities, injuries, or impairments.

The Canadian Model of Occupational Performance and Engagement (CMOP-E) was developed by the Canadian Association of Occupational Therapists in 1997, and describes transactions and mutual influences between the dimensions of occupational performance It is applied by the accompanying Occupational Performance Process Model, which describes the therapeutic process from a client's perspective The ...

Canadian model of occupational performance and engagement

ABSTRACT This paper is a synthesis of the available literature on occupational therapy interventions performed in the adult intensive care unit (ICU). The databases of Ovid MEDLINE, Embase, the Cochrane Library, ClinicalTrials.gov and CINAHL databases were systematically searched from inception through August 2016 for studies of adults who received occupational therapy interventions in the ICU.
