But for all I know, if people stop eating meat and adopt vegetarian ways, they could feed at least 10 times more people using the same efforts and energy. This is based on the principle of energy-pyramid which states that the at least 10 units of vegetation is consumed to prepare 1 unit of meat by feeding the meat-producing animals.

Do the Math. In my recent Context of Calories post, I explained how the different macronutrients we eat at each meal (fats, proteins, and carbohydrates) have different effects in the body. I suggested that, despite their raw calorie values, it's far more important to get a lasting intuitive sense of how much of each macronutrient you need and when you need it (or not).

Conversion therapy is the pseudoscientific practice of trying to change an individual's sexual orientation from homosexual or bisexual to heterosexual using psychological or spiritual interventions. There is virtually no reliable evidence that sexual orientation can be changed and medical bodies warn that conversion therapy practices are ineffective and potentially harmful.
