

feline rabies pdf

Programs supporting regular feline vaccination have contributed both to the health of cats and to public health.. Currently, there are geographically defined core vaccines and individually chosen non-core vaccine recommendations for cats. A number of controversies surrounding adverse reactions to vaccines have resulted in authorities revising their guidelines for feline vaccination.

Rabies is a viral disease that causes inflammation of the brain in humans and other mammals. Early symptoms can include fever and tingling at the site of exposure. These symptoms are followed by one or more of the following symptoms: violent movements, uncontrolled excitement, fear of water, an inability to move parts of the body, confusion, and loss of consciousness.
