Instrumentation engineering is the engineering specialization focused on the principle and operation of measuring instruments that are used in design and configuration of automated systems in electrical, pneumatic domains etc and the control of quantities being measured. They typically work for industries with automated processes, such as chemical or manufacturing plants, with the goal of ...

Industrial control system (ICS) is a general term that encompasses several types of control systems and associated instrumentation used for industrial process control.. Such systems can range from a few modular

panel-mounted controllers to large interconnected and interactive distributed control systems with many thousands of field connections.

A simple loop drawing is still required and an assessment of power/maximum surface temperature needs to be completed. Conclusion. Flameproof (Ex d) offers hazardous area protection for zone 1 and 2 and offers protection for higher voltage (110 VAC, 220 VAC) applications and requires mechanical planning and preparation.

Instrumentation and control is a field applicable to many sectors of industry. It enables efficient and safe automatic control of large-scale continuous processes including nuclear power stations, oil refineries and chemical plants down to smaller batch operations such as manufacturing centres, breweries and other food production facilities.
