The capacity for exceptional memory can take several forms.

Exceptional memory - Wikipedia
Savant syndrome is a condition in which someone with significant mental disabilities demonstrates certain abilities far in excess of average. The skills at which savants excel are generally related to memory. This may include rapid calculation, artistic ability, map making, or musical ability. Usually just one special skill is present. Those with the condition generally have a ...

In Experiment 1, we used an auditory dual-task paradigm previously developed by the authors (Fairnie, Moore, & Remington, 2016).The primary task was an auditory search task, and the secondary task was an auditory detection task.

A sound advantage: Increased auditory capacity in autism
Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing".But not knowing is not always obvious or clearly understood.That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.

Intelligence Smart Genius Gifted Wisdom Ignorance
Abstract â€œWeak central coherenceâ€• refers to the detail-focused processing style proposed to characterise autism spectrum disorders (ASD). The original suggestion of a core deficit in central processing resulting in failure to extract global form/meaning, has been challenged in three ways.
