The concepts that seeded nanotechnology were first discussed in 1959 by renowned physicist Richard Feynman in his talk There's Plenty of Room at the Bottom, in which he described the possibility of synthesis via direct manipulation of atoms. The term "nano-technology" was first used by Norio Taniguchi in 1974, though it was not widely known.

Special Issues. As of February 2015, Accounts of Chemical Research introduced a newly formatted special issue in which articles accepted for a special issue will appear online when ready in one of our regular monthly issues, while at the same time, appearing in the special issue itself being built online on its own dedicated webpage.
