Lumber (American English; used only in North America) or timber (used in the rest of the English-speaking world) is a type of wood that has been processed into beams and planks, a stage in the process of wood production. Lumber is mainly used for structural purposes but has many other uses as well. There are two main types of lumber. It may be supplied either rough-sawn, or surfaced on one or ...

City & Guilds and the Cross-Industry Construction Apprenticeship Task Force (CCATF) have joined forces to bring a new approach to apprenticeships in the UK construction industry, ensuring that it has the skilled people it needs both now and in the future.

Construction - Vocational Education and Apprenticeships

Introduction INTEC College has been involved in providing courses to the construction industry since 1984. There is now a renewed focus on training for the construction industry as a means

Construction - INTEC College

Straw-bale construction is a building method that uses bales of straw (commonly wheat, rice, rye and oats straw) as structural elements, building insulation, or both. This construction method is commonly used in natural building or "brown" construction projects. Research has shown that straw-bale construction is a sustainable method for building, from the standpoint of both materials and energy ...

This guide is a concise reference tool that combines the experiences of architects, main contractors, engineers, warranty providers, manufacturers, and BRE who have applied modern

A guide to modern methods of construction - Trent global

DesignerVeneer, inspired by the Australian Outback, is a specially selected range of veneer board to achieve the natural beauty of timber in the most environmentally sustainable form, for vertical applications.

COLOURpyne by Gunnensen

Precast concrete offers durable, flexible solutions for floors, walls and even roofs in every type of domestic construction from individual cottages to multi-storey apartments. Concrete's high initial embodied energy can be offset by its extended life cycle (up to 100 years) and high potential for reuse and relocation.

Precast concrete | YourHome

Rammed earth walls (aka pise) are constructed by the compacting (ramming) of moistened subsoil into place between temporary formwork panels. When dried, the result is a dense, hard monolithic wall.

GreenSpec: Environmental Advantages of Rammed Earth

With over 500,000 users downloading 3 million documents per month, the WBDG is the only web-based portal providing government and industry practitioners with one-stop access to current information on a wide range of building-related guidance, criteria and technology from a 'whole buildings' perspective.

WBDG | WBDG - Whole Building Design Guide

This section describes the skills and knowledge required for this unit. Required skills . Specific skills are required to achieve the Performance Criteria of this unit, particularly for its application in the various circumstances in which this unit may be used.

training.gov.au - RIIHAN211A - Conduct basic scaffolding

Planning for Construction. To achieve the client's aspirations on cost, programme and quality, planning for construction should start at the very beginning of the design process. Such planning should consider the construction sequence, the design factors that affect buildability, and site practice in terms of typical erection plant.
