

radio technologies and concepts pdf

The distinction between science, engineering, and technology is not always clear. Science is systematic knowledge of the physical or material world gained through observation and experimentation. Technologies are not usually exclusively products of science, because they have to satisfy requirements such as utility, usability, and safety. [citation needed]

A radio-frequency identification system uses tags, or labels attached to the objects to be identified. Two-way radio transmitter-receivers called interrogators or readers send a signal to the tag and read its response.. RFID tags can be either passive, active or battery-assisted passive.

As there are three typical edge computing solutions for IoT, it is necessary to highlight the differences among them, and the development of a framework for edge computing technologies with reference to background,

system architecture, and key techniques is challenging.
