The Centers for Disease Control and Prevention (CDC)'s Checklist for Prevention of Central Line Associated Blood Stream Infections (CLABSI) lists as its No. 1 task for clinicians: Perform daily audits as to whether each central line is still needed.

Two New Evidence-Based Steps for CLABSI Reduction

Our mission is to make nursing homes better places to live, work and visit by advancing quality and performance improvement in nursing homes.

National Nursing Home Quality Improvement Campaign

The Ebola virus disease outbreak in west Africa and the rapid spread of other emerging viruses, such as the severe acute respiratory syndrome or the Middle East respiratory syndrome coronaviruses, showed how limited or non-existent infection prevention and control (IPC) programmes, combined with an inadequate water supply, poor sanitation, and a weak hygiene infrastructure in health facilities ...

Global infection prevention and control priorities 2018â€“22

Creating an enabling environment for infection control in health facilities is very important, as this will ensure that the administrative, environmental and personal controls can be implemented.

HIV and TB in Practice for nurses: TB infection control

Since publication of the Society for Healthcare Epidemiology of America position paper on Clostridium difficile infection in 1995, significant changes have occu...

Clinical Practice Guidelines for Clostridium difficile

Influenza, commonly known as the flu, is an infectious disease caused by an influenza virus. Symptoms can be mild to severe. The most common symptoms include: high fever, runny nose, sore throat, muscle pains, headache, coughing, sneezing, and feeling tired. These symptoms typically begin two days after exposure to the virus and most last less than a week.

Influenza - Wikipedia

Human immunodeficiency virus infection and acquired immune deficiency syndrome (HIV/AIDS) is a spectrum of conditions caused by infection with the human immunodeficiency virus (HIV). Following initial infection, a person may not notice any symptoms or may experience a brief period of influenza-like illness. Typically, this is followed by a prolonged period with no symptoms.

HIV/AIDS - Wikipedia

Topics provide a way to find more content about a subject and do targeted searching on JSTOR. These new topics are drawn from a thesaurus curated from 21 source vocabularies, and are automatically matched with a brief description from Wikipedia.

Strategies to Prevent Clostridium difficile Infections in

Description. NRSNG Academyâ€™s Fundamentals course is the course youâ€™ll definitely want to have for your first semester of nursing school! We introduce the Nursing Process and how to start thinking like a nurse.

The Ultimate Nursing Care Plan Database | NRSNG

Viral culture was the time-honored gold standard for influenza diagnosis. However, 3- to 10-day turnaround times for results reduce its utility for patient management, although shell vial culture can produce results in 48 hours with similar accuracy .More recently, reverse transcriptase polymerase chain reaction (RT-PCR) has replaced viral culture as the gold standard.
