DMX512 (Digital Multiplex) is a standard for digital communication between lighting fixtures and a lighting console. It is a serial digital protocol that allows a lighting console to control up to 512 channels of lighting fixtures. The protocol is based on the RS-485 standard, which is a balanced, differential signaling protocol. The DMX512 protocol is used to control the intensity, color, and position of lighting fixtures. It is a simple and reliable protocol that is widely used in the lighting industry.
